

Origins Matter Short Course

This is an accelerated “boot camp” online program, surveying the basics of biblical creation apologetics. It combines reading lessons online with reviewing several DVDs, to unpack and digest many relevant Biblical and scientific truths about origins. The Origins Matter Short Course is not just academic;

after a fast tour of the “big picture,” you are given a set of personal challenges, for applying these important truths to the real world of your own life (and the lives of others).

Short Course Level 1

What kind of truth does the Bible provide? How reliable and how relevant is its information about our origins? How do we know that the Bible’s information is true? How does Biblical truth match (or otherwise compare to) the world of facts that can be learned by using the scientific method? These questions are the core of what is called “Biblical epistemology,” which this unit focuses on, comparing Biblical revelation truth with the knowledge we can gain by studying creation scientifically. In Level 1 (of ICR’s ORIGINS MATTER Short Course series), Biblical epistemology is analyzed with apologetics applications, within a multidisciplinary context. Also, special attention is given to why creation origins matter—including how our own origins are relevant to the trustworthiness and relevance of Genesis history, testing logic accuracy and assumptions, how to analyze creation evidences, and how to distinguish reliable proof from science fiction.

STUDY MATERIALS NEEDED

- DVD set: **God of Wonders** (available from ICR)
DVD: **What You Aren’t Being Told About Astronomy, volume 1** (available from ICR)
DVD set: **Nuclear Strength Apologetics, Parts 1 & 2** (available from AiG)
DVD: **The Indestructible Book** (produced by International Baptist Missions; available from AMAZON.COM & maybe also from *The Berean Call*)

Short Course Level 2

Level 2 (in the ORIGINS MATTER Short Course series) builds upon Level 1. Topics covered include the creation apologetics of living creatures (including their origins and present-day dynamics), the Genesis Flood and its impact on Earth history (including fossil evidences), dinosaurs (including how dinosaur bones’ soft tissue proves that dinosaurs did not live millions of years ago), the age of the earth, and the age of the cosmos. The course concludes with personal applications, such as how God’s personal care for each of us is best appreciated within the context of what the Bible teaches about Christ’s linked roles as Creator and Redeemer.

- DVD: **What You Aren't Being Told About Astronomy, volume 2** (available from ICR)

NOTE: Depending on the consumer response to Units #1 and #2 we may develop more units, maybe sometime next year. IF, as, and when they occur, we will update the description by replacing it with an expanded version.
